

Tips for Success in Digital Learning

Create a learning space.

This should be an area where you only focus on school work and is free of distractions.

Set a schedule.

Hold yourself accountable by sticking to a similar schedule you would have while in school. This will also help you manage your time wisely.

It's okay to take breaks.

Get up and stretch, have a snack or take a walk after working for 30-45 minutes. This will allow you to refresh your brain.

Participate.

Engaging in online group discussions with peers and teachers will give you a feeling of being more invested in your studies.

Don't be afraid to ask for help.

If you are feeling overwhelmed or not understanding how to complete an assignment, ask your parent, teacher or counselor.
